

# Creating Custom Views

Created	@July 16, 2025 2:21 PM
Tags	Live View

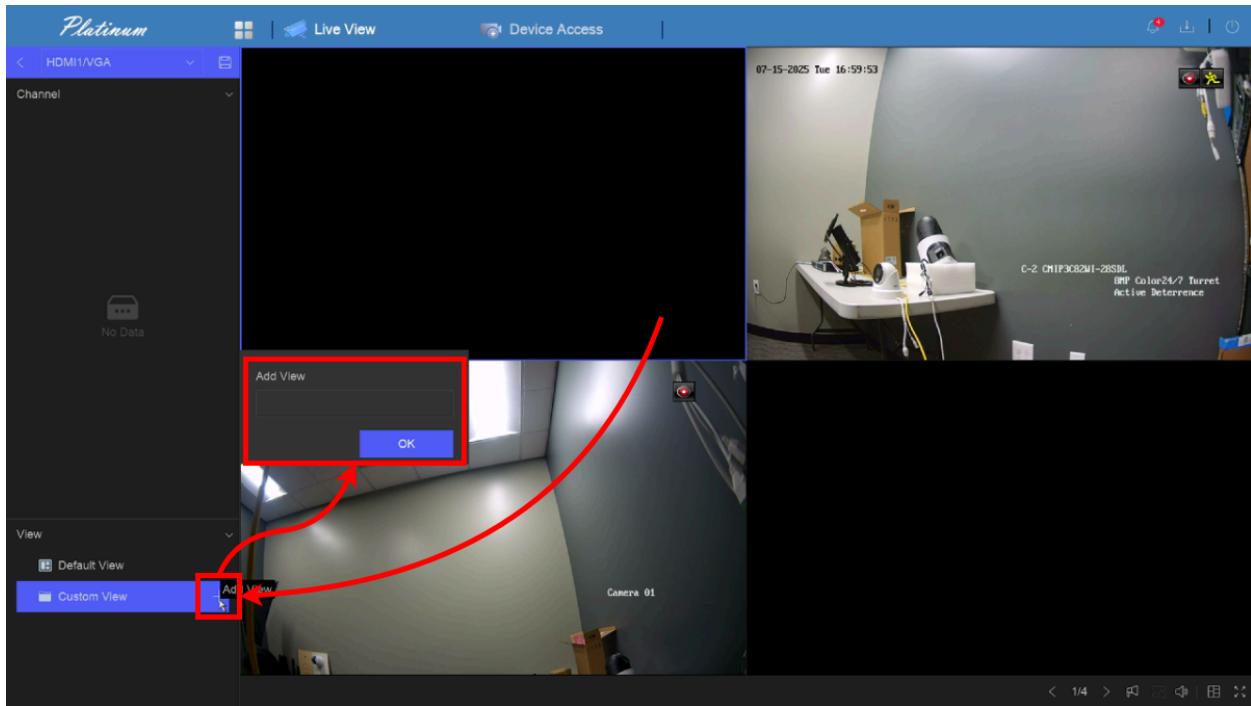

## Step 1

Custom views can also be created to quickly load up a desired set of cameras. First click on the gear icon to the right of "View" in the bottom left corner.

## Step 2

Afterwards, click on the "+" symbol to the right of "Custom View". Type in a name for the custom view and then click "OK". Afterwards proceed with the view creation which is the same as in the live view or spot out configuration.

### Step 3

After having saved the custom view, it can be loaded up by clicking on the name of the custom view in the bottom left. The exact view will be loaded up as was created in step 2.
