## Add Domain.

Click <u>Create New Domain</u> to create your first Domain Location.

The Domain Creation will auto find the current location IP address, if it is not the right one. Please change it.

#### **DNS Host Name**

address.

Create Your DNS host name (length up to 11 char)\*

For example, YourStreetName2019 .dvrlists.com

Congratulation, your domain is created

\*Note: The reason recommend tries to keep under 11 chars,

because some of the mobile app won't able to detect longer

### Management

#### Login Login first.

 Remember:
 use Google Chrome Browser to Login.

 All other browsers may not respond correctly.

Here is all your domain information listed.

If you can't find it, use the Search box.

**Status** tells the domain is Enable/Disabled. But It is not saying the Online/Offline please understand.

If you want to see the condition, see Last Update.

Click <u>the IP field</u>, you can modify the IP address. Change the # first, click hand icon to confirm. or, click tool icon to cancel the change.

Status	IP	Action
Enabled	65. 10 🔧 🖆	× 🖯 向

If you want to disable this address, click the Lock icon (Enable/Disable)

Fingerprint shows the Geo location information.

#### Account Information

You can modify your account information from here.

There are two functions I think you like to know.

- Domain Status. It will show how many domain you have and now many updated.
- 2. Export your account information You can export your domain information to the Excel CSV file.

Logout Account Domains	
Edit Account Name Email Edit your account information	Edit Password Password Confirm password Change your password
User Information Member since: 11/10/2015 4:59:00 PM Name: Jimmy Wang Export your account information Delete your account	Domains

# **DVR/NVR DDNS Configuration**

- 1. Configure DDNS thru IE configuration is easier for Typing.
- 2. Configuration > Network > Basic Settings.
- 3. Select DDNS tab.
- 4. Here is the information

DDNS type	LTS (Default)
Server Address	ns1.dvrlists.com (don't change)
Domain	<u>xxxxxxx.dvrlists.com</u>
User Name	(dvrlists.com <b>email address</b> )
Password	(dvrlists.com login password)

5. click Save first, then click TEST

# Troubleshooting: (if the test Failed)

Make sure your DNS number is correct. OR, use 8.8.8.8

Please make sure the Domain name after **.dvrlists.com** make sure the address is spell correct and there is no extract char after.

Make sure the Login User is the dvrlists.com Email address and Password correct. (go to the website to verify again)
