

Firmware Update

1. Click Admin > Software Settings

The screenshot shows the Defendas software interface. At the top, there is a navigation bar with icons for Home, Monitor, Access, Config, Admin, Back, and Forward. The Admin icon is highlighted with a red box. Below the navigation bar is a sidebar with a 'Controllers' section showing 'Your controller is online'. The main content area has a 'Administration' sidebar with options: User Roles, Backup and Restore, Archive Downloads, System Settings, Network, Date and Time, Email Settings, and Software Settings. The Software Settings option is highlighted with a red box and has a mouse cursor icon over it. To the right of the sidebar is a table showing backup and client information. At the bottom is a log table with various events.

2. Click Update Software to open the prompt window, then browse the PC to select the firmware file. After selecting the file, proceed through the update process.

The screenshot shows the Software Settings page. The 'Software' section is expanded. On the left, there are details: Version 3.7.41, Build 2025-11-18-122137, and Architecture zmm28. Below these are buttons for 'Update Software' (with a red box and a red arrow pointing to a 'Browse' button in a modal dialog) and 'Factory Reset'. The 'Current Device' section shows 'Defendas COI'. On the right, a modal dialog titled 'Sentinel Series' is open with the 'Update Software' button. The 'Browse' button is highlighted with a red box and has a red number '2' above it, indicating it is the next step. The 'Cancel' button is also visible.
