## Alarm Monitoring

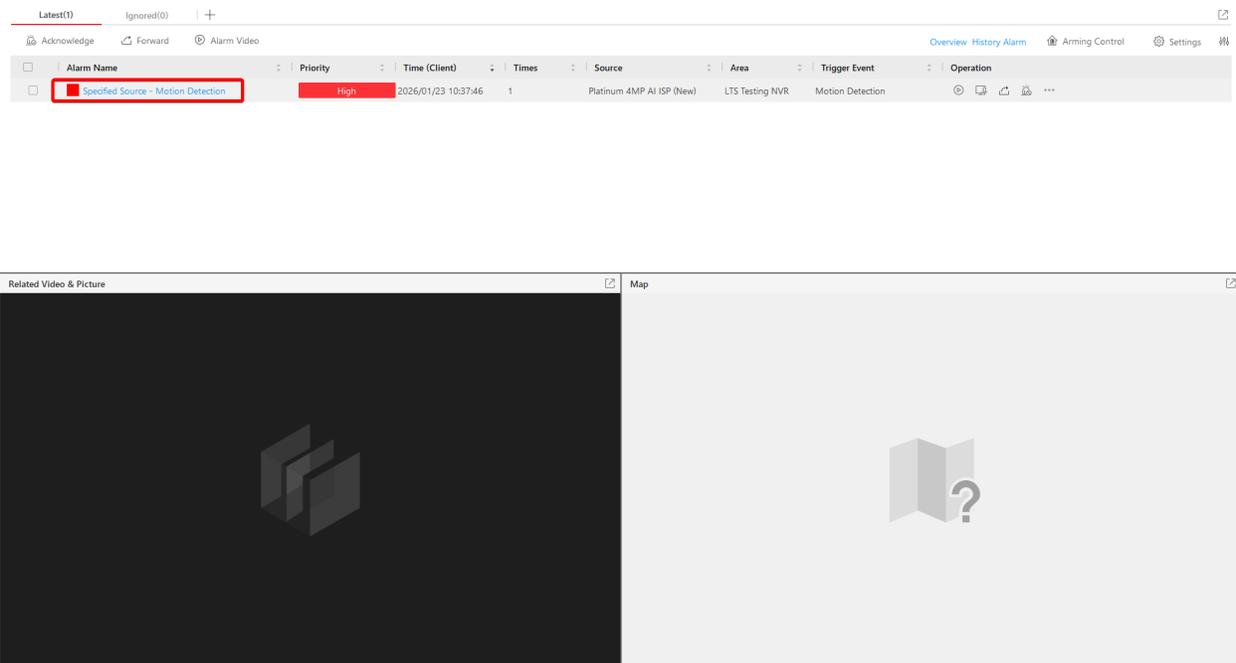

Back in the control panel, click on "Alarm Center" to open the menu for monitoring alarms.

In the Alarm Center, any alarms that have been configured for the user will appear should they occur.

When alarms occur, click on the Alarm. If the alarm is related to a cameras event, a window will appear that begins the playback of the camera for that event.

Alarm Information

Specified Source - Motion Detection

Alarm Source: Platinum 4MP AI ISP (New)  
Trigger Event: Motion Detection
